Introducing

Insta Pressfit™
Pressfit Quality & Purity

A division of

From the CEO's Desk

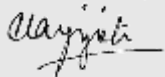

Dear Friends,

I feel privileged to be interacting with you through this message. I have spent over 2 decades working in multinational corporations, apart from my professional life I am a mother too and I know the importance of clean & hygienic water. The thought of rusty pipes carrying daily drinking water for families and their loved ones is unacceptable to me and for that reason my team is bringing in a true game changer in this industry. InstaPressfit™ meets and beats the highest order of satisfaction to all aspects of durability & safety in plumbing.

We understand that remaining at the forefront in the pipes & fitting industry will happen only if we put customer at the centre. With the support of our partners, customers, shareholders and employees, InstaPressfit™ is committed to providing quality & purity.

I am confident that my team is delivering a product that will not affect the quality of water and give hassle free plumbing solutions along with better & healthy lives.

Best regards,

Harjyoti Kaur | CEO | Aaira India LLP

Pure

It is resistant to corrosion and will not react with toxic chemicals

Client Testimonials

“Insta Pressfit” product quality and consistency in performance are at par with products available in international markets. Their timely service and customer-oriented approach is something that we appreciate. We rely on Insta Pressfit for using stainless steel plumbing pipes & fittings to ensure hygiene, safety & durability to our esteemed customers.”

Anil Arora

Chandigarh

Now I’m convinced to use Insta Pressfit 316L SS Pipes more often, initially I was bit spectacle as in 2013 they were new in the market but keeping their performance and service in past 4 years now I am confident to suggest Insta Pressfit to my customers.

316L S.S plumbing technology is the future of household plumbing.
